

Simple Solutions.

Exceptional Experience.

Established in 1993, IAS Technology (formerly Integrated Audio Systems, Inc.) is an audiovisual systems integration firm dedicated to sales, design, installation, and service of professional audio/video systems.

We serve a wide variety of markets including corporate enterprise, higher education, medical simulation, command and control centers, conference and training rooms, house of worship, collaborative web-conferencing, streaming, and any other facility with audiovisual technology systems.

IAS provides worldwide audiovisual system solutions and service. IAS is recognized by the Audiovisual and Integrated Experience Association (AVIXA)® as an Audiovisual Provider of Excellence.

Services

Systems Integration

IAS Technology will meet one-on-one to understand your challenges, needs and desires. Our design team will create a solution and deliver a clear and understandable proposal. Our goal is to create cost conscious solutions for each one of our clients. Each solution we create will enhance the user experience and minimize set-up time. The IAS staging and installation process will ensure quality and reduce the amount of room downtime.

Design & Standardization

IAS Technology has a team of certified design engineers that focus on more than just the technology. As organizations realize the financial impact audiovisual technology has, the need to develop corporate standards across the enterprise increases. IAS can help develop these standards. Our design team is one of the most innovative in the world focused on you and the user experience. IAS also offers audiovisual design and consulting services when the bid process is required.

Managed Services & Maintenance

IAS Technology offers a variety of maintenance and managed service plans to fit your budget and maximize your investment. Plans include but are not limited to:

- Pre-Paid Discounted Service Labor
- Recurring Preventive Maintenance
- Extended Warranties
- Emergency Service Plans
- Service Rewards Program

IAS prefers a proactive approach to meeting your needs while providing invaluable data analytics about your audiovisual technology.

The user experience (UX) is the most important part of any solution. How often are people afraid of the technology they have at their disposal? The audiovisual system should be a tool for business which everyone uses. IAS strives to minimize the amount of time needed to set up any audiovisual system. Providing systems that just work is what IAS is all about. The user experience is about more than the technology itself. Leonardo da Vinci said it best, "Simplicity is the ultimate sophistication."

Importance of the User Experience

"IAS made the entire integration process easy. The solutions we are developing across the enterprise are intuitive and easy to use regardless of the experience level of the user." —Josh M, AV/IT Specialist, Regional Healthcare Provider
